

TEMPO

TEMPO is TouchTunes' all new route management tool which replaces the Operator Dashboard and Compass. Completely redesigned for today's business needs, TEMPO boasts advanced features and design elements, making it our most innovative and efficient tool ever!

EASY ACCESS ON-THE-GO

Quickly and easily manage your TouchTunes route right from your desktop, tablet or smart phone.

SIMPLIFIED MUSIC MANAGEMENT

Use the new Quick Manage Tool to easily set up automated rules for managing your 1-credit favorites.

LIVE JUKEBOX STATUS

Help boost your route revenues by reviewing your jukebox statuses in real time. Know when your best locations are turned off or paused during prime time.

REMOTE SERVICING

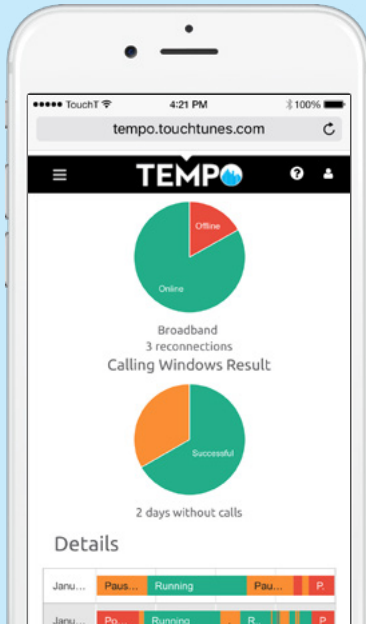

Take action by using your desktop, tablet or smart phone to turn on a jukebox, unpause it, force a call or reboot it. This can help maximize uptime and revenues while reducing service calls.

Start using TEMPO today and explore TEMPO's powerful features and capabilities for managing your jukeboxes. You can log into TEMPO by using your previous dashboard credentials. Reach out to your sales representative if you would like additional information or training!
